

HUSHON (UK) LTD
GLASGOW CINEMA

Hushon UK World Record Cinema

In late 2000, Hushon UK supplied twenty Air Handling Units for a new 18 screen Cinema, spread over six levels, in the city Centre of Glasgow, each AHU had to be stripped down and then rebuilt within each floor plant room.

This was one of the most difficult and challenging projects even undertaken by the Hushon AHU rebuild team, working very close with the main mechanical contractor, the whole rebuild project was completed within just four weeks.

The Cinema has an entry in the Guinness Book of Records for the WORLDS tallest Cinema, at a height of 203ft (62m), with a seating capacity of 4,300.

For further information on our full range of Air Conditioning & Ventilation equipment, please contact our sales office on 023 92 324 335 or email sales@hushonuk.co.uk or visit our web site, www.hushonuk.co.uk
